DENSIFIER

TECHNICAL DATA SHEETS

DESCRIPTION

ADDENSANTE THICKENER ADDITIVE is a special densifier for mineral lime-based products:

- glossy plaster in all its range;
- Venetian plaster in all its range;
- plaster finish in all its range.

DENSIFIER is composed by a special hardener alkali polymer and other additives in an homogeneous blend.

DENSIFIER rapidly restore the viscosity to lime-based product.

DENSIFIER is suitable to increase the viscosity of all lime-based products.

USE

ADDENSANTE is needed when the product viscosity is not adequate for the application. Pour the **ADDENSANTE** in the product and mix carefully until a complete blend is achieved. In few minutes the viscosity of the product increases.

If the product is still too liquid to apply, wait for about another 60 min and if necessary, proceed with pouring another **ADDENSANTE** pack, gradually and carefully mixing the blend.

Be careful! An over dosage of ADDENSANTE may cause excessive hardness of the product.

STORAGE

The product maintains its properties for a period of 24 months if protected from excessive heat and cold.

The storage temperature must be included between **+5°C** and **+30°C**. Protect from frost.

SAFETY GUIDELINES

Avoid contact with skin and eyes. If contact occurs, rinse thoroughly with water. For more information consult the safety sheet.

DISPOSAL

The product must be disposed in agreement with current regulations. Empty containers have to be sent to recycling plants.

TECHNICAL SPECIFICATION

Appearance	liquid
Colour	neutral white
Packaging	net 50g
Specific weight	0,99 ± 0,03 Kg/l
pH	7,5 ± 1
Dosage	50g for 24Kg of basic product
Temperature	min +5°C; max +30°C
