FINE WAX

Description	A mineral wax in paste form which acts as a protective barrier against water and dirt.
Composition	Paraffin
Application fields	to protect in interior: MARMORINO VENEZIANO CLASSIC MARMORINO VENEZIANO CARRARA
Color	Semi-transparent white.
Appearance	Thick paste
Specific weight	0,79 kg. / lt.
Inflammability	flammable. Point of flammability 45°C
Packaging	lt 1,0 metallic container
Theoretical Yield	lt 1 apply 18 sq/m
Shelf live	48 months
Storage Suggestion	0°C to 25°C
Application Temperature	10° to 30°C
Safety Norms	Keep far for fire sources or high temperature: it is flammable. Keep out of reach of children. Frequent use can be causes of skin dryness Contains Dearomatic Hydrocarbon: protect breathing when apply it.
Disposal	Product must be disposed of according to norms and regulations in force. Containers must be recycled.
Voc:	(direct. 1999/13/CE) 75,19% - 594,00 g/ l of product

APPLICATION NOTE:

For best results as a liquid and dirt repellent apply 24 hours after the stucco has been finished. Using a soft cloth or better a metal trowel.

Apply a very thin layer all over the surface. Be careful to apply a very thin layer, if lamps remain on the surface will cause stains: to reduce this risk we suggest to apply first a coat of our Bee's wax and then to use the Paraffin wax.

After seven hours from application you can buffer by hand with a soft cloth or a mechanic buffer.

It is used into the shower area and in general where is required a strong protection from water, but also where is needed a high glossy finish.
