METALLIC NATURAL BEE'S WAX – Silver and Gold

HOW TO USE IT

It is used to give metallic shades of color to plasters. Is used on Marmorino as well as on Travertino or other lime based finishes.

It is often applied with a trowel when the plaster is still wet to have special transparence of colors since part of the wax penetrate into the plaster and other remains on the surface.

On dry Marmorino it is usually applied after the application of the normal bee's wax.

Both the Silver and the Gold can be tinted in different colors. You can apply several different application in different shades or colors to special effects

Always remove the excess after each coat.
